

Wil Gerard

Software Engineer | Designer

SUMMARY

I'm a creative, detail-oriented, and versatile software engineer with a background in graphic design. I welcome learning opportunities and am enthusiastic about collaborative problem-solving. My goal is to find a long-term position on a team with an inclusive environment that fosters growth as an engineer.

EXPERIENCE

100Devs | Software Engineer

October 2020 — Present

- Currently developing a social media app to help those whose incomes were negatively affected by the pandemic quickly network into tech.
- Working with a team of volunteers - I actively participate in each stage of our process:
 - Collaborative whiteboarding on Notion
 - Wireframing on Figma
 - Iterative development through Git and Github

Avenues Recovery | Independent Contractor

February 2021 — November 2021

- Redesigned and developed a responsive website with custom-created assets, including logo design, photography, and copywriting.
- Post website launch, site activity increased by over 100% - connecting those in need to addiction treatment.

Foci MCGA | Independent Contractor

February 2019 — March 2020

- Designed marketing assets, developed web pages, and photographed events for a successful \$50k capital campaign - funding construction for Minnesota's only non-profit glass studio and education center.
