Wil Gerard

JavaScript Developer | Graphic Designer

SUMMARY

I'm a creative, detail-oriented, and versatile JavaScript developer with a background in graphic design. I love building connections with others and helping their ideas come to life with code. I'm a passionate lifelong learner and get excited about collaborative problem-solving. My goal is to join a team with an inclusive environment that helps me grow as a designer and developer.

EXPERIENCE

100Devs | Software Engineer

October 2020 — Present

- I'm a lead engineer on a team building a social media app to help early-career software engineers quickly build a supportive network through LinkedIn, Twitter, and Github.
- I actively participate in each step of our process, including collaborative whiteboarding on Notion, wireframing on Figma, and iterative development through Git and Github.

Avenues Recovery | Independent Contractor

February 2021 — November 2021

- Designed and developed a fully responsive website built with HTML, CSS, and JavaScript
- Created marketing and branding assets for the company; logo design, photography, and copywriting.

Foci MCGA | Independent Contractor

February 2019 — March 2020

- I assisted with web design, development, graphics, photography, and copywriting for the Minnesota Center for Glass Arts.
- Projects included designing their strategic plan for 2020-2022 and creating marketing assets for a successful $50k capital campaign.
