Wil Gerard

Software Engineer | Full-stack Developer

SUMMARY

I'm a creative, detail-oriented, and versatile software engineer that loves building connections with others and helping non-profits solve problems. I have a passion for learning new technologies and building full-stack applications. With a background in graphic design, I excel in frontend React development and UI/UX.

My current goal is to join a team for the long term that advances my coding knowledge and complements my skill set.

EXPERIENCE

100Devs | Software Engineer

October 2020 — Present

- A lead engineer on a team building a full-stack social media app. Our goal is to help early-career software engineers quickly build a supportive network through LinkedIn, Twitter, and Github.
- Our tech stack includes React, Tailwind CSS, Node.js, Express.js, Axios, and MongoDB.

Avenues Recovery | Independent Contractor

February 2021 — November 2021

- Redesigned and developed a fully responsive website for an outpatient addiction recovery center in St. Paul, MN.
- Built with HTML, CSS, JavaScript, and Github Pages.
- Lead a full rebrand of the company. This included a logo, style guide, web design, photography, and marketing.

Foci MCGA | Independent Contractor

February 2019 — March 2020

- Creative director of a capital campaign for Minnesota's only non-profit public access glass studio and education center; Raising over $500k and successfully funding the construction of a new glass center in south Minneapolis.
- My responsibilities included branding, copywriting, photography, and web/graphic design.
