Wil Gerard

Professional Summary

I'm a full stack software engineer with 5+ years of experience developing modern web applications.

I bring UX instincts from my graphic design background, fluency across the JavaScript/TypeScript ecosystem, and a strength in bridging product, design, and engineering. I'm a passionate problem solver who enjoys improving complex workflows, mentoring developers, and building products with real world impact.

Experience

Developer Advocate | Vaisala Xweather

July 2026 - Current

- Own Xweather's developer example apps and tutorials, showing developers how to integrate its weather APIs and MapsGL mapping SDK into web applications
- Engineered a React and TypeScript app pairing the Xweather API with Claude via MCP, turning natural language weather questions into live results on an interactive map
- Shipped a reusable React and TypeScript layer control for MapsGL, covered by Storybook interaction tests and released with a tutorial and open source example repo

TypeScript | React | MapsGL | Storybook | MCP | REST APIs

Software Engineer | Freelance

February 2021 - Current

- Selected projects include designing and implementing booking workflows for a client site, migrating a client from a Supabase/AWS backend to a Django/PostgreSQL implementation, and rebuilding a landing site that improved traffic by 40%

TypeScript | Next.js | Tailwind CSS | Node | MongoDB | PostgreSQL

Portfolio website: **wilgerard.com**

Software Engineer | Augeo

March 2023 - Oct 2025

- Contributed to full stack development across Next.js, Node, GraphQL/Apollo, MongoDB, and React Native projects
- Mentored 4 new developers in documentation, ticket writing, and automated testing. Reviewed and provided feedback on their work to foster growth and maintain quality standards
- Supported monolith to microservices architecture changes through documentation and developer onboarding improvements.
- Resolved critical frontend issues including race conditions, inconsistent state after edits, and cross-browser UI bugs
- Stabilized automated test coverage across Playwright and Jest, improving suite reliability from roughly 30% passing to stable passing coverage and reducing execution time by about 50%

TypeScript | Next.js | React Native | Storybook | Node | GraphQL | Apollo

Skills

Languages
TypeScript | Python

AI Tools
Claude Code | Cursor | Codex | GitHub Copilot | MCP

Frontend
React | React Native | Next.js | Material UI | Tailwind CSS | Storybook

Backend
Node | Express | GraphQL | Apollo | REST APIs | Django

Database
PostgreSQL | MongoDB

Cloud & Deployment
AWS | Cloudflare | Render | Netlify | Neon | Docker

Testing & CI/CD
Playwright | Jest | Cypress | Chromatic | GitHub Actions | CircleCI | Datadog

Education

Minneapolis Community & Technical College

2013

Associate of Applied Science, Graphic Design

Volunteer Work

100Devs

Mentor

Currently offer mentorship and tutoring to a Discord community of over 70,000 developers
